what do we really know about how the grammar topics that seem to dominate language teaching are used in conversation in this book the authors explore some of the big beasts of english grammar those familiar structures like conditionals and reported speech that are often emphasised in syllabuses and textbooks drawing on a corpus of conversation data the book provides new insights into how these structures actually function in real life conversations revealing how grammar teaching often overlooks key contextual uses aimed at teachers researchers and curriculum designers the book encourages readers to rethink grammar explanations and instruction it challenges long standing rules and assumptions also offering practical ideas on how to better incorporate grammar into lessons that focus on spoken english covering important grammar areas such as modal verbs quantifiers and comparatives it s a valuable resource for those interested in how grammar operates in real world dialogue

he international workshop on models and analysis of vocal emissions for biomedical applications maveba came into being in 1999 from the particularly felt need of sharing know how objectives and results between areas that until then seemed quite distinct such as bioengineering medicine and singing maveba deals with all aspects concerning the study of the human voice with applications ranging from the newborn to the adult and elderly over the years the initial issues have grown and spread also in other fields of research such as occupational voice disorders neurology rehabilitation image and video analysis maveba takes place every two years in firenze italy this edition celebrates twenty four years of uninterrupted and successful research in the field of voice analysis

this volume explores how diachronic construction grammar can shed new light on changes in a central and well

researched domain of grammar namely modality its main goal is to show how constructional analyses can help us address some of the long standing questions that have informed discussions of modal expressions and their development and to illustrate the processes that are involved in these developments on the basis of data from languages such as english finnish french galician german and japanese the studies in this volume are organized around three interrelated topics the first of these concerns the organization of modal constructions in a network a second focus area of the studies in this volume concerns the developmental pathways that modal constructions follow diachronically the third topic that ties the contributions of this volume together is the contrast between constructionalization and constructional change

this book brings together the selected revised papers representing a multidisciplinary approach to language and literature the collection presents studies performed using the methods of computational linguistics in accordance with the traditions of russian linguistic and literary studies primarily in line with the leningrad petersburg philological school the book comprises the papers allocated into two sections discussing the study of corpora in language translation and literary studies and the use of computing in language teaching and translation and in emotional text processing a unique feature of the presented collection is that the papers compiled in one volume allow readers to get an understanding of a wide range of research conducted in saint petersburg state university and other russian leading scientific institutions both the classical tradition of saint petersburg philology and the results obtained with the help of new computer technologies as a sample of the symbiosis of technologies and traditions which bring research to a qualitatively new level to arouse interest
